

Assistive Technology Services for Individuals who have Traumatic Brain Injuries

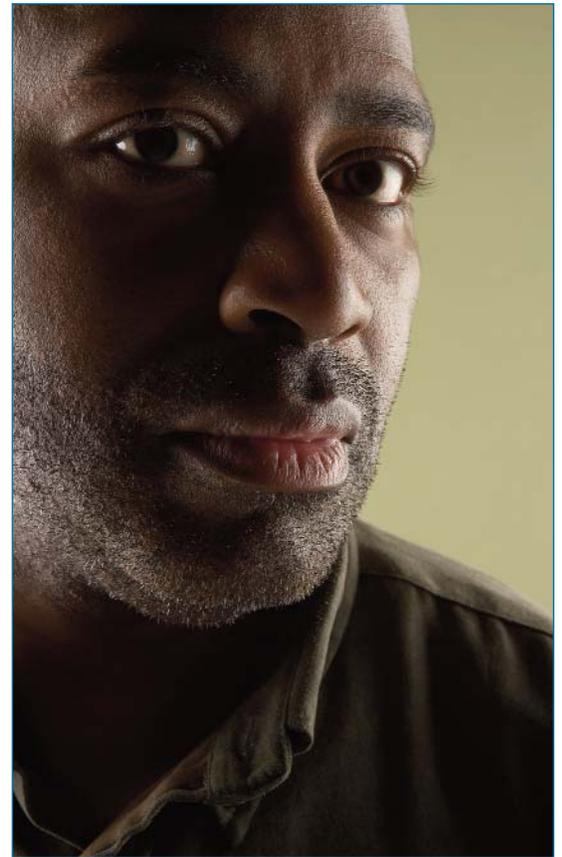

Advancing Opportunities (formerly Cerebral Palsy of New Jersey) provides assistive technology and home modification evaluations for people who have sustained a traumatic brain injury.

Our team of qualified professionals can help identify the technology that will be most effective in creating a safe and accessible home environment. We can also provide the necessary training.

Our solutions are tailored to meet the specific needs of an individual and his or her family. Our staff is mobile and will visit the home.

We can provide solutions for:

- ❖ Entrance and egress: ramps, doorways, railings
- ❖ Interior living space: bathrooms, handrails, lifts
- ❖ Computer access: software, mouse alternatives, ergonomic equipment, switches
- ❖ Technology for memory and organization: personal digital assistants, software, global positioning systems

For more information or to schedule an evaluation, contact the Assistive Technology Services Department at 609-882-4182 ext. 595 or visit our website: www.AssistiveTechnologyCenter.org.

1005 Whitehead Road Extension, Suite 1, Ewing, New Jersey 08638
Toll Free: 1-888-322-1918 Online: www.advopps.org Email: info@advopps.org

We Can Help With:

Environmental assessments in and around a home to determine the safest, most effective way of getting in and out of everything from the bathtub to the house itself.

Exterior solutions may include ramps, wider doorways or the installation of handrails.

Interior solutions may include grab bars, lifts, bathroom modifications or wider doorways. They may also include adapted electronic controls.

Computer Access -- from alternative mice options to specialized software, our staff can help people with brain injury find ways to use the computer.

Technology Aids for Memory and Organization can provide reminders and visual and auditory cues through the day to help people with brain injuries maintain schedules and stay focused.

Many of the devices recommended by our staff are available through our **Technology Lending Center**. Memberships start as low as \$35 per year and allow people to try devices for up to six weeks before buying.
